

Hydro Fuel 4 part base nutrient system, this easy to use grow formula is perfect for the craft cultivator who wants more control during the vegetative stage.

GROW A: 4-0-3 GROW B: 0-4-5 BLOOM A: 5-0-3 BLOOM B: 1-2-5

HYDRO FUEL

- 🟢 BASE NUTRIENT
- 🌱 VEGETATIVE STAGE
- 🌸 FLOWERING STAGE

WHAT IT IS

Hydro Fuel Grow is the grow component of the Hydro Fuel 4 part base nutrient system, designed to allow for more control and diversity in your feeding regimen during the vegetative stage of growth. This Hydro Fuel base nutrient system provides the necessary differential between Grow and Bloom cycles with 2 parts for the vegetative and flowering stage. Part of the Hydro Fuel Feed Program.

HOW IT WORKS

Hydro Fuel Grow provides your plants with an array of nutrients they need to thrive during the vegetative stage of growth. The Grow component is split into A and B formulas to ensure a diverse range of macro, micro, and secondary nutrients are delivered to your plants. High amounts of nitrogen (N), as well as added phosphorous (P), potassium (K), and calcium (Ca) ensure robust and healthy foliage growth. We only use the finest raw materials and fully chelated elements to ensure a consistent and reliable formula that delivers with every use. Having a distinct Grow component gives growers more control and allows them to dial in a feeding regime that fits their garden. In order to push plants to their natural limits, growers need to have more control over when their plants receive certain nutrients in order to incorporate other additives and adapt to certain strain-specific needs. Hydro Fuel was designed for just this reason.

HOW TO USE IT

Use Hydro Fuel Grow at a rate of 1-3 mL/L (4-11mL/Gal).

Mix Part A at the desired ratio then stir before you add part B, it is not advisable to mix concentrated A with B before they are diluted in the appropriate amount of water.

HYDRO FUEL BLOOM A GUARANTEED ANALYSIS	
Total Nitrogen (N).....	4.2%
0.2% Ammoniacal Nitrogen	
3.2% Nitrate Nitrogen	
Soluble Potash (K ₂ O).....	0.0%
Calcium (Ca).....	0.0%
Boron (B).....	0.02%
Cobalt (Co).....	0.0008%
Iron (Fe).....	0.1%
